EDUCATION

Rajarshi Shahu Arts, Science & Commerce College

Bachelor of Science (B.Sc) in Computer Science

Aurangabad | Sep 2022 – Jun 2025

Kendriya Vidyalaya, Chh. Sambhaji Nagar Cantt.

10th – 12th Standard

Aurangabad | 2016 – 2022

SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap

Backend: Node.js, Express.js

Database: MongoDB, Mongoose

Tools: Git, GitHub, Postman

Others: JSON, Responsive Web Design, Deployment (Render, Vercel & Netlify)

BLOG

When I started learning web development, I was fascinated by how websites work — from the buttons we click to the data that gets saved in a database. After exploring various technologies, I decided to dive into the **MERN stack**, and it has been an exciting journey ever since.

The MERN stack is a group of four technologies that work together to help you build a full website or web application. It includes MongoDB, Express.js, React.js, and Node.js. The best part is that all of these use the same programming language — JavaScript. That made it easier for me to understand and connect the frontend and backend parts of a website [read more](#)
